

CARMEL-BY-THE-SEA: CALIFORNIA COTTAGE

NC CONSTRUCTION

BUILT ON TRUST. BUILT TO LAST.

Project Specifications:

This Carmel-by-the-Sea: Coastal Cottage project involved demolishing an existing cottage to construct a new 2,800 sq ft home. Designed to channel the historical character of old Carmel cottages, the new build featured bat and board siding, wood windows, built-in cabinetry, decorative beams, and detailed casework. Outdoor highlights included a built-in BBQ area, making indoor-outdoor living smooth. Completed in 18 months, the home mixes classic design and modern comfort, a quality that is quite fitting for Carmel-by-the-Sea.

“Building this traditional cottage-style home in Carmel-by-the-Sea was a fun project. Collaborating with the owner, an accomplished builder from the Bay Area, made it rewarding as we combined craftsmanship and shared expertise to create a home full of detailed interior finishes and timeless charm.” *Nason Campbell Owner, NC Construction*
